

Holders for Mitac Mio 168

Holders for Mitac Mio 168 are available with different features in order to meet different demands. All holders are attached onto a tilt swivel and can be adjusted in order to avoid light reflection on the screen. Install onto a ProClip Mounting Platform in your vehicle and you will always have you PDA within easy reach -safe and convenient!

Passive holder

Holds your PDA firmly in place. You can connect a charging- or GPS-cable to the PDA when it is in the holder.
Item no 848606

Active holder, with cigarette lighter plug

For connection to the vehicle's cigarette lighter socket. When you put the PDA in the holder, it automatically connects to the charging device.
Item no 968606

Active holder, for fixed installation

For a professional installation without loose cables hanging over the dashboard. With a straight cable with open end for fixed installation. Install over 5A fuse behind the dashboard.
Item no 978606

Holder for cable attachment, with built in connector

The choice for you who often connect e.g. a GPS- or charging/data-cable to your PDA. Fits all cables that fit with the PDA, both original and aftermarket cables (Leadtek, Royaltek, Holux, Haicom etc). You attach the cable to the bottom of the holder the same way as you do to the PDA, but you don't have to attach it manually every time you put the PDA in the holder.
Item no 849606

Holder for cable attachment, for cable plug attachment

You can attach e.g. a GPS-cable or a sync/data-cable to the holder. When you put the PDA in the holder, the cable connects to the PDA automatically, so you do not have to connect it manually every time.
(Cable not included.) Fits cables with the same connector as shown in the picture.
Item no 846606
